

Code: OREMN/TP Oil Absorbent Rolls

FEATURES

- Oil absorbent material
- Fast absorbent action
- Bonded for extra strength
- Perforated for easy tearing
- Clean to use
- Strong wicking action for maximum absorption
- Ideal under leaking machinery
- Prevents floor contamination
- Reduces the need to clean the floor
- Helps protect the environment
- Hydrophobic - will only absorb hydrocarbons (oil, fuel, solvent)
- Suitable for industrial applications
- Can be used outdoors to absorb oil only, even when water is present

APPLICATION

- Under leaking machinery
- Under plant and vehicles
- As an engineers workmat - comfortable, insulating, catches drips and leaks from components
- Outdoors - fuel dispensing areas
- Large 'footprint' to absorb wide areas of spillage
- Skims oil off surface of water - ponds, tanks, interceptors
- General use oil absorbent

SPECIFICATION

Code:	OREMN/TP
Pack qty:	2 rolls
Size:	50cm x 40 metres
Capacity:	98 litres per roll
Packaging:	Poly-wrapped

MSD sheet available upon request.

OREMN/TP

Rip & Place Double Weight Oil Absorbent Rolls

An excellent absorbent material for a multitude of industrial and environmental applications. Dimple bonded for extra strength and perforated for easy tearing, these absorbent rolls will not absorb water and can be used outdoors to absorb oils and fuels without absorbing rainwater. They can also be used by engineers as comfortable workmats to catch leaks and drips during maintenance works or under and around leaking machinery to prevent floor contamination and reduce clean-up time.
