

Spillvac Interceptor Kit

FEATURES

- Unique fitting kit to allow liquid to be drawn immediately into 200L drum
- Stainless steel for long life
- Works with 110v and 240v Spillvacs

Specification:

Code: WD-INT-KIT-A

- 1 Fitting A: Vacuum to drum
- 1 Fitting B: Drum to hose tool
- 1 2m length of hose

Code: WD-INT-KIT-B

- 1 Vacuum to drum fitting
- 1 Drum to vacuum hose tool
- 1 2m length of hose
- 1 Metal drum dolly

Code: WD-INT-KIT-C

- 1 Vacuum to drum fitting
- 1 Drum to vacuum hose tool
- 1 2m length of hose
- 1 Metal polyethylene drum dolly

Spillvac interceptor Kit

The interceptor kit allows liquid to be drawn immediately into a 200L drum using the draw force of the vacuum unit. This allows liquid to be collected straight into the receptacle for disposal or recycling as opposed to collecting it into the vacuum unit then transferring it to a 200L drum.

The interceptor kit consists of two metal fittings engineered to fit into the top of a standard metal 200L drum.

Fitting A: connected to the vacuum unit via a section of hose (see main diagram)

Fitting B: connected to hose with brush, wand or other tool (see main diagram)
